

Dear Industrial partner and future Euro Fed Lipid corporate member,

The European Federation for the Science and Technology of Lipids (Euro Fed Lipid) would like to invite you to present your company at its

**Oils, Fats and Lipids:
Health & Nutrition, Chemistry & Energy
21-24 November 2010, Munich**

Euro Fed Lipid, today an international federation of 11 national Oils and Fats associations from different European countries, and still expanding, is involved in the European trade fair "Oils+Fats", until 2009 a yearly event organized in Munich by the Messe Munich. To reply better to the needs and demands of the Oils and Fats industry, this Oils and Fats exhibition will continue from 2011 as a bi-annual trade fair, thereby skipping the 2010 trade fair.

In order to allow industry to present its latest technologies and services, Euro Fed Lipid is offering the industry the possibility to rent a **table top** at the Euro Fed Lipid conference in Munich.

This annual conference offers also a good forum for exchanging ideas and remaining up to date of new and future developments and furthermore gives industry the chance to become scientifically more visible.

Euro Fed Lipid and its member associations would really welcome a more active presence of the industry, to enhance interaction with the different scientific associations.

I would therefore like to ask especially the industry to consider an active presence at this conference and/or support Euro Fed Lipid by applying for a corporate Euro Fed Lipid membership.

If you want to **present your company** in Munich and use this unique opportunity, please visit our Euro Fed Lipid website:

www.eurofedlipid.org/meetings/munich/index.htm#Tabletop

React fast as table tops are limited !

If you want to support Euro Fed Lipid by becoming a **corporate member**, please visit our website:

<http://www.eurofedlipid.org/membership/index.htm>

Or simply contact Frank Amoneit, amoneit@eurofedlipid.org.

I count on your active presence in Munich,

Marc Kellens
President Euro Fed Lipid
